

BioPlus 2B
Efficacy Trials - Broilers

BioPlus 2B

Efficacy Trials
Broilers

Broiler breeders, Denmark

The Influence of BioPlus 2B given to broiler breeders as a feed additive (1kg BioPlus 2B was included per tonnes feed). The farm was infected by *E.coli*. Trial period was from age 28 to 60 weeks. Denmark 1995.

	Control	+ <i>BioPlus 2B</i>
No. of animals	10,000	6,600
Mean no. of eggs/hen	149	151.5
Mortality in percent	9.9	8.2
Breeding results (% saleable broilers)	65.8	68.9

The number of saleable broilers was significantly increased by 4.7%. Mortality rate after 60 weeks was decreased by 1.7% point.
