

BioPlus 2B
Efficacy Trials - Broilers

BioPlus 2B

Efficacy Trials
Broilers

Broilers, Brazil

The Influence of BioPlus 2B given to chickens as a feed additive at an inclusion of 400g BioPlus 2 B/tonne feed and had Probios soluble (lactic acid bacteria) added the water on day 1 and 2 of their life and the production results compared to a positive control group having Staquinol 60 (Chlorhydroxyquinolin) and Enradin F80 (dried extract of *Streptomyces fungicidicus*). Coop. *Triticola de erechim Ltda*, September- November 1999.

	+ Antibiotics	+ <i>BioPlus 2B</i>	Difference %
No. of animals	125,067	12,223	-
Mean weight/chicken, (g), 34 days	1,530	1,557	+2
Kg feed/kg weight gain after 34 days	1.83	1.81	-1
Mortality rate in percent	2.97	2.65	-11

Slaughter weight was increased 2%. Feed conversion, in kg feed/kg weight gain, was improved by 1%. Mortality rate was decreased by 11%.
